

Cover Letter

Dear Sir/Madam.

I am applying for the position of Python Developer. I have enclosed my resume with detailed work experience during my Masters. Based on the job description and my prior experience with working in Python & Machine Learning Models during the last four years, I think this position looks both fun and challenging—and a great place for me to further my career!

If you have a moment, I would love to ask you more questions about the tools you are using and the types of projects I might be running if hired. And, if you have any questions about my resume, feel free to reach out over email or call me directly at my phone number in the signature. You can also visit my GitHub page here **<https://github.com/exoticmaina/Projects>** to have a look at the applications that I have developed.

Hope to hear from you soon,

Bhabajeet Kalita,
Masters of Applied Computer Science,
Georg August University of Goettingen, Germany
